

FUNCTIONAL CLASSIFICATION

TECHNICAL SUPPORT: MARIO EDSON OLIVEIRA SILVA, ELCIRLEY LUZ SILVA, CLEVERSON FIDELIS AND MARIO HENRIQUE ALMEIDA TORQUETE
TEXT EDITING: GENTLE ART MEDIA

CLASS A1

AMPUTEE
PREVIOUS CLASS: D

Upper limb amputation. Includes above-elbow amputees and bi-amputees.

CLASS A2

AMPUTEE
PREVIOUS CLASS: E

Upper limb amputation. Includes arm amputees and bi-amputees below the elbow.

CLASS A3

AMPUTEE
PREVIOUS CLASS: C

Lower limb amputation. Includes above-the-knee amputees and bi-amputees.

CLASS A4

AMPUTEE
PREVIOUS CLASS: A

Lower limb amputation. Includes amputees and bi-amputees below the knee.

CLASS B1

BLIND
PREVIOUS CLASS: B1

Total visual impairment. It includes individuals with no perception to light in both eyes with an inability to recognize the shape of a hand at any distance or direction. Parathletes in this category compete with the aid of an audio description of the score and the minutes throughout the fight.

CLASS B2

BLIND
PREVIOUS CLASS: B2

Partial visual impairment. It includes individuals who have figure perception, with the ability to recognize the shape of a hand up to a visual acuity of 2/60 or a visual field of less than five degrees. Parathletes in this category compete with the aid of an audio description of the score and minutes throughout the fight.

CLASS B3

BLIND
PREVIOUS CLASS: B3

Subnormal visual impairment. It includes individuals who can define images with a visual acuity of 2/60 to 6/60 or a visual field between 5 and 20 degrees. Also includes monoculars. Parathletes in this category compete with the aid of an audio description of the score and minutes throughout the fight.

IMPORTANT NOTES

[I] The new functional classification of the FBJJP aims to universalize the categories of ParaJiu-Jitsu worldwide. [II] All new categories present numbered subclasses where subcategory 1 (one) refers to the most severe form of the disability contemplated in that category. [III] Categories where there are no subdivisions are also designated with the numeral 1 (one). In this way, future updates should be included in the sequence (2, 3, 4, etc). [IV] Letters of the alphabet that have not been used in this version are reserved in the sequence for possible future updates. [V] During the transition period to the new FBJJP functional classification, two pieces of information must be shared with users for educational purposes: "Phonetic Analogy" refers to the English phoneme used for association with the new nomenclature, such as Amputee for Class A and Blind for Class B. "Former Class" refers to the nomenclature used until 2021 to designate the functional classification of the category in question.

FUNCTIONAL CLASSIFICATION

TECHNICAL SUPPORT: MARIO EDSON OLIVEIRA SILVA, ELCIRLEY LUZ SILVA, CLEVERSON FIDELIS AND MARIO HENRIQUE ALMEIDA TORQUETE
TEXT EDITING: GENTLE ART MEDIA

CLASS C1

COGNITION
PREVIOUS CLASS: O

Clinical diagnoses of cognitive impairments that include, but are not limited to, autism spectrum disorders (ASD) and attention deficit hyperactivity disorder (ADHD).

CLASS C2

COGNITION
PREVIOUS CLASS: O

Clinical diagnoses of cognitive impairments including, but not limited to, Down syndrome and other syndromic conditions where technical learning is not compromised.

CLASS C3

COGNITION
PREVIOUS CLASS: O

Intellectual and cognitive disabilities. It includes individuals with any degree of functional or clinical disability of cognitive functions where technical learning is not compromised.

CLASS D1

DEAFNESS
PREVIOUS CLASS: F

Bilateral total hearing loss. Includes individuals with total hearing loss. Para-athletes in this category struggle without the use of a hearing aid.

CLASS E1

ENCEPHALO
PREVIOUS CLASS: O

Individuals with severe cognitive and motor impairments secondary to traumatic brain injury (TBI).

CLASS E2

ENCEPHALO
PREVIOUS CLASS: O

Individuals with moderate or mild cognitive and motor impairments secondary to traumatic brain injury (TBI).

CLASS E3

ENCEPHALO
PREVIOUS CLASS: L

Complications of Cerebral Vascular Accident (CVA) or Encephalic Vascular Accident (EVA). Individuals with stroke sequelae that compromise limb mobility in any configuration and are able to remain upright in a sitting position without assistance.

CLASS E4

ENCEPHALO
PREVIOUS CLASS: N

Congenital or other non-traumatic encephalopathies. Individuals with impaired cognition and/or mobility due to neurological diseases of different origins. They include cerebral palsy of any origin.

CLASS E5

ENCEPHALO
PREVIOUS CLASS: N

Multiple sclerosis or other conditions that compromise brain function, optic nerve, and/or spinal cord. They include progressive neurodegenerative disorders.

IMPORTANT NOTES

[I] The new functional classification of the FBJJP aims to universalize the categories of ParaJiu-Jitsu worldwide. [II] All new categories present numbered subclasses where subcategory 1 (one) refers to the most severe form of the disability contemplated in that category. [III] Categories where there are no subdivisions are also designated with the numeral 1 (one). In this way, future updates should be included in the sequence (2, 3, 4, etc). [IV] Letters of the alphabet that have not been used in this version are reserved in the sequence for possible future updates. [V] During the transition period to the new FBJJP functional classification, two pieces of information must be shared with users for educational purposes: "Phonetic Analogy" refers to the English phoneme used for association with the new nomenclature, such as Amputee for Class A and Blind for Class B. "Former Class" refers to the nomenclature used until 2021 to designate the functional classification of the category in question.

FUNCTIONAL CLASSIFICATION

TECHNICAL SUPPORT: MARIO EDSON OLIVEIRA SILVA, ELCIRLEY LUZ SILVA, CLEVERSON FIDELIS AND MARIO HENRIQUE ALMEIDA TORQUETE
TEXT EDITING: GENTLE ART MEDIA

CLASS I1

IRREVERSIBLE PARALYSIS BY POLIOMYELITIS
CLASSE ANTERIOR: J

Serious and irreversible complications of polio. Individuals with severe sequelae of poliomyelitis in the upper limbs.

CLASS I2

IRREVERSIBLE PARALYSIS BY POLIOMYELITIS
CLASSE ANTERIOR: J

Serious and irreversible complications of polio. Individuals with severe sequelae of poliomyelitis in the lower limbs.

CLASS I3

IRREVERSIBLE PARALYSIS BY POLIOMYELITIS
CLASSE ANTERIOR: I

Mild or moderate and irreversible complications of polio. Individuals with mild or moderate sequelae of poliomyelitis in the upper limbs.

CLASS I4

IRREVERSIBLE PARALYSIS BY POLIOMYELITIS
CLASSE ANTERIOR: I

Mild or moderate and irreversible complications of polio. Individuals with mild or moderate sequelae of poliomyelitis in the lower limbs.

CLASS K1

VERTEBRAL DISK
CLASSE ANTERIOR: K4

Cervical spinal cord injury. Individuals with lesions in the cervical segments (C1 to C8), which are related to movements and sensitivity of the cervical region and upper limbs.

CLASS K2

VERTEBRAL DISK
CLASSE ANTERIOR: K3

Upper thoracic spinal cord injury. Individuals with lesions in the upper thoracic segments (T1 to T7), which are related to movements and sensitivity of the chest and part of the upper limbs.

CLASSE K3

VERTEBRAL DISK
CLASSE ANTERIOR: K2

Low thoracic spinal cord injury. Low thoracic spinal cord injury. Individuals with lesions in the lower thoracic segments (T8 to T12), which are related to movements and sensitivity of the abdomen and part of the upper limbs.

CLASS K4

VERTEBRAL DISK
CLASSE ANTERIOR: K1

Lumbar spinal cord injury. Individuals with lesions in the lumbar segments (L1 to L5), which are related to the movements and sensitivity of the lower limbs.

IMPORTANT NOTES

[I] The new functional classification of the FBJJP aims to universalize the categories of ParaJiu-Jitsu worldwide. [II] All new categories present numbered subclasses where subcategory 1 (one) refers to the most severe form of the disability contemplated in that category. CLEVERSON FIDELIS AND MARIO HENRIQUE ALMEIDA TORQUETE
TEXT EDITING: GENTLE ART MEDIA

CLASS L1

LES AUTRES
CLASSE ANTERIOR: N

It includes individuals with motor disabilities not included in the previous classes. Classification subject to analysis by the FBJJP Functional Classification Department.

CLASS N1

NANISM
CLASSE ANTERIOR: M

Nanism or dwarfism. It includes individuals with short stature derived from skeletal dysplasia such as achondroplasia, hypochondroplasia or any other congenital disorder that impairs growth.

CLASS P1

PLEXUS
CLASSE ANTERIOR: H

Total brachial plexus injury. Includes individuals with brachial plexus nerves damaged by stretching, pressure, or cutting, in whom arm mobility, uni or bilaterally, is totally compromised.

CLASS P2

PLEXUS
CLASSE ANTERIOR: G

Partial brachial plexus injury. Includes individuals with brachial plexus nerves damaged by stretching, pressure, or cutting, in whom arm mobility, uni or bilaterally, is partially compromised.
